Course Specifications

| | |
|---|--|
| Programme(s) on which the course is given | Metal Products and jewelry |
| Major or Minor element of programs | Major |
| Department offering the program | Metal Products and jewelry |
| Department offering the course | Metal Products and jewelry |
| Academic year / Level | 4 th Year / second semester |
| Date of specification approval | |

A- Basic Information

| | | | |
|---------------|---------------|--------------|---|
| Course Title: | Ergonomics II | Course Code: | |
| Credit Hours: | 3 | Lecture: | 2 |
| | | Tutorial: | |
| | | Practical: | 2 |
| | | Total: | 4 |

B- Professional Information

1 – Overall Aims of Course

- Acquire knowledge and capabilities required to respond to special consumers (disable, elderly, women, children) design needs
- Gain skills of ergonomic environmental measurements, data manipulation and predicting norms and standards and the use of results to solve work environment problems.
- Utilize ergonomic applications in avoiding work environmental risks and elevate workers awareness of ergonomic standards
- State an obvious role for designers in dealing with ergonomic complications and adapt tools to match Egyptian worker capabilities and limitations.
- Develop students ability to utilize human and physical resources to achieve a better ergonomic relation between man and working environment, tools and equipment.
- Improve student capacity in critical evaluation of special cases of design.
- Acquire cooperative work skills in performing surveys and large samples exploitation.
- Identify techniques of ergonomic problems administration through analysis and evaluation to find most advantageous solutions.
- Identify possible strategies for setting up a safer and comfortable work environment and for minimizing workloads and enable the best arrangement of worker and work environment and tools.
- Study major considerations and requirements for the control of work environment and organization of equipment and work duties to realize best match for human capabilities
- Expand student capabilities of understanding and evaluating environments and workplaces that realize workers comfort and safety.

2 – Intended Learning Outcomes of Course (ILOs)

a) Knowledge and Understanding:

| | |
|-----------------|---|
| U ₁ | Define terms related to disability and handicapped |
| U ₂ | Identify characteristics of disabled users of products |
| U ₃ | Acknowledge the importance and methods of designing for the handicapped consumer. |
| U ₄ | Recognize design requirements for the disabled users of products |
| U ₅ | Distinguish women as a special case of product users |
| U ₆ | Categorize characteristics of female users of products |
| U ₇ | Admit the importance and methods of designing for women. |
| U ₈ | Recognize design requirements for the female users of products |
| U ₉ | Pregnant woman as a special design case study |
| U ₁₀ | Acknowledge the importance and methods of designing for children. |
| U ₁₁ | Recognize design requirements for the young users of products |
| U ₁₂ | Acknowledge the importance and methods of designing for the elderly consumer. |
| U ₁₃ | Identify characteristics of elderly users of products |
| U ₁₄ | Recognize design requirements for the elderly users of products |
| U ₁₅ | Describe cognitive skills such as perception, memorizing and reasoning |
| U ₁₆ | Distinguish basic concepts of motor response |
| U ₁₇ | and mental workload Study the influence of decision-making |
| U ₁₈ | Elevate awareness of the significance and concepts of skilled performance |
| U ₁₉ | Appreciate the significance of human-computer interaction |
| U ₂₀ | Assess the impact of work stress |
| U ₂₁ | Appreciate the significance of human reliability |
| U ₂₂ | Recognize the human information Handling |
| U ₂₃ | Categorize dynamic and static information display |
| U ₂₄ | Compare Audio and Graphical information display |
| U ₂₅ | Discuss elements of the thermal environment |
| U ₂₆ | Study Noise impact of human perception |
| U ₂₇ | Recognize the significance of lighting |
| U ₂₈ | Discuss individual differences in response to different classes of lighting |
| U ₂₉ | Recognize design requirements for Seating |
| U ₃₀ | Define basic communication skills and concepts |
| U ₃₁ | Evaluate resource management techniques |
| U ₃₂ | Be acquainted with work design essentials |
| U ₃₃ | Explore and be aware of materials handling techniques |
| U ₃₄ | Identify concepts of virtual organization, and participatory design |
| U ₃₅ | Recognize major workplace layout and planning considerations |
| U ₃₆ | Be familiar with elements of organizational culture |
| U ₃₇ | Be aware of major considerations of shift work |
| U ₃₈ | Understand control-display layout and compatibility aspects |
| U ₃₉ | Appreciate considerations of safety and health |

b) Intellectual Skills

| | |
|----------------|---|
| I ₁ | State the nature of ergonomics problems related to work place and work environment design |
| I ₂ | Resolve samples of ergonomics problems related to the relation between man and his working environment design. |
| I ₃ | Practice skills of analysis and exploring elements of problem solution |
| I ₄ | Acquire an innovative ability in dealing with ergonomics problems related to the design for handicapped, elderly, children and women and other cases of special consumer. |

| | |
|----------------|--|
| I ₅ | Recognize and make effective recommendations in written and/or graphical form to correct human factors deficiencies in existing human-machine systems. |
| I ₆ | Identify questions or problems in the realm of human factors engineering appropriate for research. |
| I ₇ | Predict the most effective environmental factors affecting human work performance |
| I ₈ | Resolve problems of the interaction between special cases of consumers with their work, products and services offered for them. |

c) Professional and Practical Skills

| | |
|-----------------|--|
| P ₁ | Practice using ergonomics values and methodologies in the design of clothing, dressing & grooming aids |
| P ₂ | Practice performing functional design of bedroom products for the special consumer |
| P ₃ | Investigate design criteria of cooking, drinking and tableware aids For the special consumer. |
| P ₄ | Design ergonomic conventional household tools for the handicapped and/or elderly within the house |
| P ₅ | Design ergonomically approved rehabilitation equipment or tools for the workplace |
| P ₆ | Design ergonomically accepted mobility aids products |
| P ₇ | Design ergonomically agreed upon elements of bathroom safety |
| P ₈ | Ability to identify the problem - ability to estimate cost - ability to diagnose |
| P ₉ | Practice the measurements of human body dimensions of sample of elderly or handicapped |
| P ₁₀ | Design a standard model of a working environment |
| P ₁₁ | Practice the measurements of lighting level and their impact on performance accuracy |
| P ₁₂ | Practice the measurements of noise level and their impact on human performance |
| P ₁₃ | Perform an ergonomic experiment to identify the major thermal environment elements affecting human performance |
| P ₁₄ | Perform an ergonomic experiment using pairs comparison for selecting the best design of a seat within the classroom |
| P ₁₅ | Describe in writing the meaning and importance of human factors engineering,. |
| P ₁₆ | Describe in writing and/or by illustrations human sensory, cognitive, and physical capabilities and limitations relevant to the design of human-machine systems. |
| P ₁₇ | Correctly apply human-machine system design principles to develop written and graphical design specifications. |
| P ₁₈ | Select and correctly use appropriate human-machine system analysis and design tools. |
| P ₁₉ | Describe in writing and/or by illustrations the human-machine systems engineering process. |
| P ₂₀ | Correctly apply the human-machine systems engineering process by developing analysis documents and design specifications for a simple human-machine system. |
| P ₂₁ | Design, conduct, and document an ergonomics experiment or other ergonomics study approved by the instructor. |

d) General and Transferable Skills

| | |
|----------------|--|
| G ₁ | Practice verbal and written communication with colleagues |
| G ₂ | Be acquainted with the use of sophisticated and digital technological ergonomics |

| | |
|----------------|--|
| | tool |
| G ₃ | Practice skills of cooperative work with a team in an integrated group |
| G ₄ | Perform ergonomics practices applying advances in informatics and communication technology |
| G ₅ | Act upon emergency ergonomics crisis applying methods of management |
| G ₆ | Develop skills of problem solving and innovative thinking such as brain storming.. etc. |

3- Contents

| | Topics | Hrs | Lecture | Tutor | Practice |
|----|---|------------|----------------|--------------|-----------------|
| 1. | Special Consumer Ergonomic Design | 4 | 2 | 2 | |
| | • Ergonomic Design for the handicapped | | | | |
| | • Ergonomic Design for Women | | | | |
| | • Ergonomic Design for Kids | | | | |
| | • Ergonomic Design for the elderly | | | | |
| 2. | Applications in design for the Special Consumer Ergonomics | 4 | 2 | 2 | |
| | • Design practices to respond to problems of special consumers design | | | | |
| 3. | Cognitive Ergonomics | 4 | 2 | 2 | |
| | • Mental capacity | | | | |
| | • Perception, memory and reasoning capabilities | | | | |
| | • motor response | | | | |
| | • mental workload | | | | |
| | • decision-making | 4 | 1 | | 3 |
| | • skilled performance. | | | | |
| | • human-computer interaction | 4 | 1 | | 3 |
| | • work stress | | | | |
| | • human performance reliability | | | | |
| 4. | Information Ergonomics | | | | |
| | • Human information Handling | 4 | 1 | | 3 |
| | • Dynamic and static information display | | | | |
| | • Audio information display | 4 | 1 | | 3 |
| | • information display | | | | |
| 5. | Environmental Ergonomics | 4 | 1 | 1 | 2 |
| | • Work environment design | | | | |
| | • Thermal environment | | | | |
| | • Noise | 4 | 1 | | 3 |
| | • lighting | | | | |
| | • Seating | | | | |
| 6. | Organizational Ergonomics | 4 | 1 | | 3 |
| | • Communication | | | | |
| | • Human Resource management | | | | |
| | • Work design | | | | |
| | • Materials handling | 4 | 1 | | 3 |
| | • virtual organization | | | | |
| | • Ergonomics and system design | | | | |
| | • Workplace layout | | | | |
| | • Participatory design | 2 | 1 | | 1 |
| | • Organizational culture | | | | |

| | | | | |
|---|----|----|---|----|
| 7. Work Ergonomic Applications | 4 | 1 | | 3 |
| • Work Design | | | | |
| • Material handling | | | | |
| • Shift work | | | | |
| • Control Display Design | | | | |
| • Control design | | | | |
| • Control-display layout | | | | |
| • Control-display compatibility | | | | |
| • Work safety Design | 4 | 1 | | 3 |
| • Safety and health | | | | |
| General review | 2 | | 2 | |
| Practical exam | 4 | | | 4 |
| Written exam | 2 | | | |
| Total disregarding final exam time | 60 | 17 | 9 | 34 |

4– Teaching and Learning Methods

| | |
|------------|--|
| 4.1 | lectures and interactive discussions including Power Point presentations and internet site exploration |
| 4.2 | Information collection and measurement data gathering |
| 4.3 | Practical training / lab including ergonomics and environmental measurements |
| 4.4 | Research and technical report assignment |

5- Student Assessment Methods

| | | | |
|------------|-------------------|-----------|---|
| 5.1 | Report | to assess | Student ability to prepare design reports and scientific manipulation of data |
| 5.2 | Oral Examination | to assess | Student ability to deal with others and face problems spontaneously and instantaneously |
| 5.3 | Written Exam | to assess | Student ability for understanding, comprehension and knowledge acquisition |
| 5.4 | Data manipulation | to assess | Student ability for extracting results of experimental work, analysis and weigh up estimations and perform calculations |

Assessment Schedule

| | | | |
|--------------|---|------|----|
| Assessment 1 | Report on special consumer design considerations. | Week | 4 |
| Assessment 2 | Oral test or quiz | Week | 5 |
| Assessment 3 | Report on work environment design | Week | 6 |
| Assessment 4 | Med term examination | Week | 7 |
| Assessment 5 | Report on environmental survey experiments | Week | 9 |
| Assessment 6 | Written examination | Week | 10 |
| Assessment 7 | Application project | Week | 11 |
| Assessment 8 | Final Practical/lab examination | Week | 12 |
| Assessment 9 | Final written examination (end of semester exam) | Week | 14 |

Weighting of Assessments

Final-term Examination

| |
|----|
| 60 |
|----|

 %

| | | |
|----------------------------------|-----|---|
| Mid-Term Examination | 10 | % |
| Oral Examination | 5 | % |
| Practical Examination | 5 | % |
| Semester Work | 10 | % |
| <u>Other types of assessment</u> | 10 | % |
| Total | 100 | % |

6- List of References

6.1- Course Notes

Ergonomics Experimental Notes
Ergo-eg Site Guide

6.2- Essential Books (Text Books)

- Ergonomics for human comfort and welfare, Design ergonomics Info Center Team, Cairo 2007
- Anatomy for artists and designers, Ahmed Moustafa, Vivian Ebraheem and Mohamed Hssanin Abdella, Design information center, Cairo 2007
- Anthropometry for designers, Ahmed Moustafa, and Mohamed Abdalla Radwan, Design information center, Cairo 2007

6.3- Recommended Books

Murrell J (1995) *Ergonomics*, Taylor and Francis UK
Stanley J. Ulijasze, k (2005) *Anthropometry (The Individual and the Population)*, C. G. Nicholas Mascie-Taylor , University of Cambridge
Grant J., k (2005) *Grant Anatomy*, Macmillan Publications, UK
Wilson J, (2004) *What is User-Centred Design*, Taylor and Francis, UK
Torrens George (2004) *Design Ergonomics Research Group*
Design Practice Research Group Department of Design and Technology, Loughborough University; Loughborough, UK
Roebuck et al (1998) *Engineering Anthropometric Methods* NASA, Pup USA
Lenihan J, (1991) *Human Engineering (the body examined)*, Weidenfeld and Nicolson, London.
Dale Huchingson (2001) *New Horizons for human Factors in design*, Mc Graw Hill inc, London

6.4- Periodicals

Applied Ergonomics
Ergonomics
Human factors

7- Facilities Required for Teaching and Learning

- Lecturing facilities including; data Show, Overhead Projector, Slide Projector, Internet connection

- Computer Facilities including PC w Plasma Screen and internet connection

Anthropometers – Muscle strength dynamometer - Grip Dynamometer – Light intensity meter – Digital Thermometer – Noise level Meter

- Field visits to Metal production factories, different work environment (office, industrial, educational), Rehabilitation centers, Care for the disabled and elderly centers
